Experience

January 2026 – Present

RuggedBooks – Full-Stack Developer

Full end-to-end development of an ERP platform built from scratch to optimize and centralize business operations.

- Backend: Java, Spring Boot
- Frontend: React, TypeScript, Tailwind CSS
- Promoted from IT Electronics Specialist to lead end-to-end development of the enterprise ERP system.

Oct 2024 – Jan 2026

RuggedBooks – Electronic Specialist

Specialized in keeping mission-critical rugged hardware running at peak performance.

Handled end-to-end diagnostics, repair and hardware-software integration – including embedded applications and external device compatibility for Panasonic Toughbooks, Dell and Getac platforms.

Leveraged DevOps principles in Linux environments to streamline deployments, enforce configuration consistency, and build more resilient systems.

- End-to-end diagnostics and repair for Panasonic, Dell and Getac rugged platforms
- Hardware-Software integration including embedded apps and external device compatibility
- Applied DevOps practices in Linux environments to streamline deployments

Jun 2019 – Dec 2021

V12 Comunicaciones – Junior Web Developer

Full-Stack web development for startups and companies in Colombia, focused on custom apps, eCommerce, APIs and Cloud solutions.

- Backend services for a SaaS platform using Node.JS and Express.js, supporting over 5K users.
- Migration of monolithic apps to microservices architecture on Kubernetes, reducing AWS costs by 25%.
- Development of a virtual automotive magazine, a mining enterprise app, and a vitamin eCommerce platform with payments and shipping.
- Co-developed a mobile app for cancer patients: symptom tracking and data reporting for healthcare professionals.

Education & Certificates

Sep 2021 – Jul 2024

Niagara College Canada

Programming & Analysis – Advanced 3-Year Diploma

May 2025

AWS Cloud Practitioner

Aug 2024

Advanced Linux

Soft Skills

- Problem Solving
- Goal-Oriented
- Adaptability
- Teamwork
